

Think of a recipe you can simply take from your magazine and place anywhere in the kitchen.

Magazine Inserts and Direct Mail

Magazine Inserts made on Stafix® are more likely to be placed somewhere in the recipient's home without the worry of leaving ugly marks on the surface.

Think of a sticker your children can take from their favourite magazine and post in their room without the need of tape or pins!

Many times, people attach the message just for the sake of trying the new, innovative advertising material.

Stafix® can also be used for Direct Mail applications. Ordinary coupons are likely to be thrown away after reading. As we all know it takes only one blink of an eye to forget an advertising message. We help to make the customer react to the message and produce enough pull for the campaign.
