

STAFIX®STATIC is a glue-free statically charged sticker material for temporary indoor advertising. The film adheres to almost any clean surface and is easily removable without any residue.

PRODUCT PROPERTIES

STAFIX®STATIC -products consist of two layers; a printable, electrically charged polypropylene film and a PEFC-certified cardboard backer. STAFIX®STATIC -products are 100% recyclable and PVC-free. STAFIX®STATIC -products can also be die-cut, kiss-cut and perforated.

OFFSET

INDIGO

UV-INKJET

STAFIX®STATIC -products are printable with:

- Offset (Traditional- & UV-Offset)
- HP Indigo
- UV-Inkjet

Unprinted STAFIX®STATIC -material can be stored in the original package up to 12 months. The materials should be at the same temperature as the print-room before being unwrapped.

	STORAGE CONDITIONS	PRINTING CONDITIONS
Humidity	25% to 50%	50% to 60%
Temperature	20°C to 27°C	

STAFIX®STATIC -products adhere on average for 3 months to almost any surface. The material does not stick to textile, porous or to very uneven surfaces. The less the material is repositioned, and the smoother the surface is, the longer it stays. STAFIX®STATIC is recommended for temporary indoor use.

OFFSET

Sheet-fed Traditional- & UV-Offset presses

In our **OFFSET** -products the film is attached to the cardboard backer by two gluelines.

FORMATS

- 320 x 450 mm
- 480 x 650 mm
- 707 x 1000 mm

PACKAGING

- Test kits of 200 sheets
- Pallets of 2000 sheets bulk
- Pallets of 2000 sheets ream wrapped (10 reams of 200 sheets)

VERSATILITY AND APPLICATIONS

- Long-run
- Retail POS / POP
- Posters to B1 size
- Street Marketing
- Magazine Inserts / Direct Marketing
